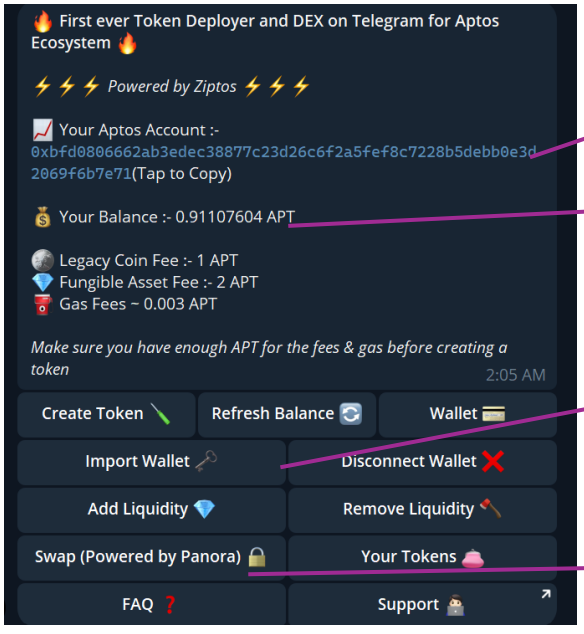
ZIPLOYER: SWAP Function guidebook

1. Click https://t.me/ZiptosBot
2. /Start and hit ENTER

3. Details of the home card appears



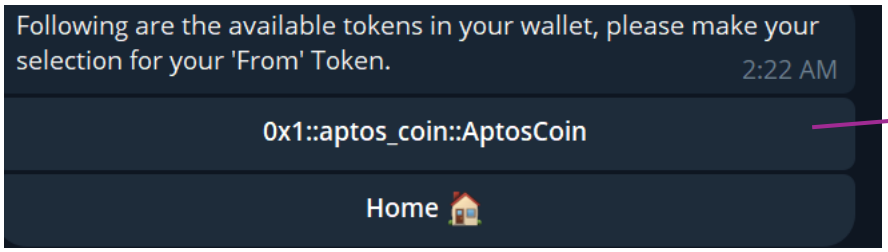
Default wallet that gets generated. You can send funds to this wallet to trade

APT balance of the default wallet, upon importing a wallet, this balance gets updated to THAT wallet APT balance

Import your own wallet and after use disconnect. Upon disconnecting that wallet will never be retrievable as a security measure, and a fresh new default wallet gets created.

The official SWAP feature of Ziployer

4. Click “Swap (Powered by Panora)”
5. The following is displayed

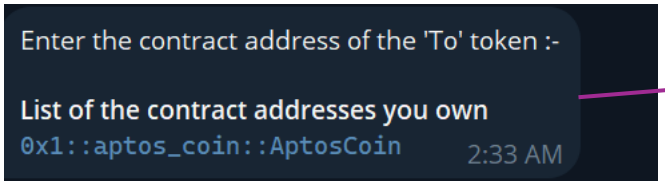


The balance of the token you want to swap **FROM** (e.g. swap **FROM** APT **TO** token X), just like it appears on a DEX of any wallet (**FROM** field). You must have the token that will be swapped FROM (otherwise what will you swap? 😊)

6. Upon clicking the FROM token (e.g. AptosCoin in this example), the following appears, either manually write, OR select the % of tokens you want to swap FROM (e.g. 25% tokens you want to swap, or 50% and so on). Alternatively, enter manually e.g. 1, 2 or .5 etc. (do not enter the symbol, just enter the number of tokens)

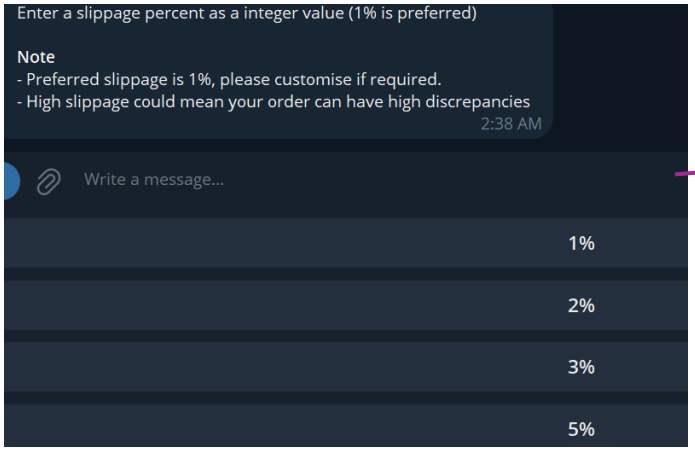
Enter or select a % of tokens you want to swap FROM.

7. Upon entering the token amount and hitting enter, the following card appears where you need to paste the contract address of the **TO** token (i.e. the token you wish to swap **TO**)



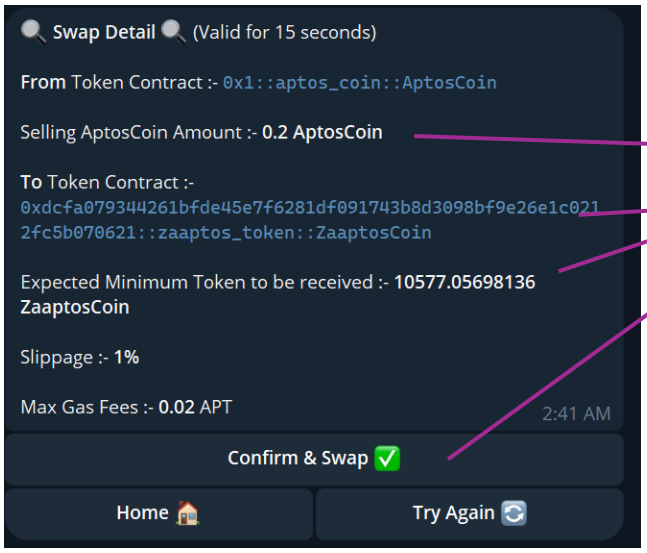
Either enter the TO token address manually, OR select from any tokens found in your wallet (because we support swapping between any tokens already in your wallet or new tokens that are not in the wallet yet)

8. Upon entering the address, the following appears where you select the slippage, default is 1% offered by Panora, soon auto slippage will be implemented



Select the slippage (note: higher slippage may mean high price impact). Recommended is 1%

9. Upon slippage selection, the following appears as a summary before you confirm the trade

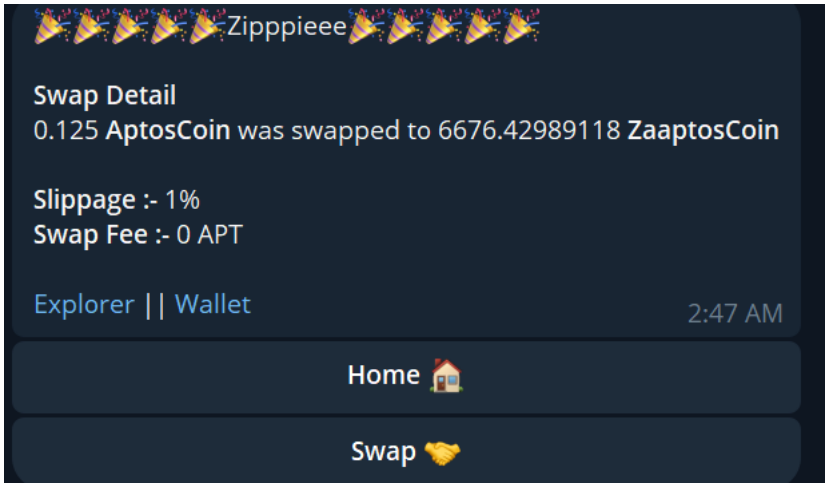


-Total APT tokens being swapped FROM

-Contract address AND amount of the TO token

-Confirm the trade

-Try again takes to step # 5 so you may correct anything right at the start

-HOME takes you to home screen


10. Upon confirm & Swap selection, a successful transaction occurs with the following message. Click SWAP for a new swap or HOME to go back to HOME CARD
